## Deliverable explanation

IRU Projects produced two different videos throughout the duration of the project. The first video was not explicitly listed among the project deliverables in WP8. In agreement with the project management team, it was decided to create a video at the early stage of the project. This was used as a visual tool for dissemination, able to summarise the project's scope and objectives. The second video is the anticipated MyCorridor Project video and is the self-explanatory deliverable D8.8 which is part of the Activity 8.1: Dissemination plans and actions. Thus, in summary, the following two videos were produced:

- First version of the video created for the first Pan-European Workshop in February 2018.
- Second and final version of the video including footage from the different pilot sites, MyCorridor Application development and testimonials from partners.

**Figure 1: MyCorridor first video opening shot.**

**Figure 2: MyCorridor second video trip planning shot.**

As the video file is not possible to be uploaded directly to the EC portal, the first video of the project can be accessed on [YouTube](#) while the second can be accessed on the [MyCorridor website](#). Any updates or enrichments that might follow will replace these versions at the same place.
